Search Notes

Examiner Akhavan,

In order to meet the requirements of your request, I've split the results into two general groups, the first relates only to claims 53-59, and the second to claim 63. I would have liked to satisfy your request for specific charges on the recombinant proteins, but that doesn't work very well. Most systems pay very little attention to charges on a molecule unless the authors make a strong emphasis on that point. The best I could do was to search for any mention of "charge" in the articles I retrieved and hope for the best.

The inventor's work appears as record number 15 on page 14 in the section relating to the first three claims and as record 8 on page 10 of the section relating to claim 63.

If you have any questions or comments about my search strategy or the results, please call or email me.

Thank you for using STIC services.

Peggy
